T.GOLD DEBUTS IN HALL 4, VICENZAORO'S NEW TECHNOLOGICAL INNOVATION HUB

- The first September edition of the international show for jewellery and gold processing technologies from 4th to 8th September in conjunction with Vicenzaoro September
- New location in Vicenza Expo Centre's Hall 4 following the completion of redevelopment work at Italian Exhibition Group's exhibition facility
- Focus on Additive Manufacturing with the Jewellery Technology Forum.
- The partnership with AFEMO and collaboration with ICE Meccanica for buyer incoming further strengthened

Vicenza, 4-8 September 2026 – T.Gold is evolving and boosting its role as **an international platform for technological innovation and machinery for the gold, jewellery and watchmaking supply chains**. The trade show will be making **its September edition** debut and, by moving into **Hall 4**, will be fully integrated inside **Italian Exhibition Group's Expo Centre for the first time**. With its extensive technology and innovation offer, it will therefore be held in conjunction with **Vicenzaoro** twice a year, in January and September. The new location, resulting from the opening of the Expo Centre's new Hall 2, will strengthen the link between the production and design worlds with technology acting as a **strategic driver for creativity and manufacturing** and Vicenzaoro as an IEG hub capable of representing **the entire jewellery supply chain** under the same roof.

Thanks to **about 170 international companies**, selected from among the very best in their fields, T.Gold is the leading showcase for technology at the service of **competitiveness** in the jewellery sector: **sustainability, recovery of precious scrap, advanced quality control, process automation and reduced time-to-market** are now the key drivers for the luxury industry's evolution, alongside the ability to **enable new forms of creativity for designers and developers**. T.Gold meets these needs by targeting the main decision-makers across the global supply chain: production and R&D managers at major jewellery and watchmaking companies; CEOs and jewellery manufacturing entrepreneurs; sustainability managers; operators in refining plants and foundries; specialist workshops and 3D designers; as well as international technology distributors and those operating in retail and high-end jewellery.

INTERNATIONAL LEADERS OF JEWELLERY MECHANICS

The exhibition will bring together some of the sector's most prominent international players in the technology field, offering a unique opportunity within the sector's trade show landscape to exhibit machinery in operation. The companies taking part will include **leading names in Italian innovation** such as **Sisma, Fasti and Orotig for industrial goldsmithing technologies and laser machinery**; **DWS and Legor Group** for additive manufacturing; **Ikoi and Tera Automation** for industrial automation; **Italimpianti Orafi, Progold** and, from Germany, **Helmut Fischer** for plant engineering, alloys and quality control.

Alongside these, T.Gold will also be hosting **top international players** such as the Swiss companies **Willemin-Macodel** and **Starrag Vuadens** for high-precision machining, **Indutherm** and **Lampert Werktechnik** from Germany for casting and micro-welding, US-based **Ransom & Randolph** for materials used in micro-casting, as well as technology companies from Asia such as **Aczet** and **Flashforge 3D Technology**. Significant attention will also be paid to solutions for sustainability and the circular economy with technologies for recovering precious metals, refining and treating industrial waste developed by **B.T.T. Italia, Balestri Technologies** and **Eurotecniche**.

THE JEWELLERY TECHNOLOGY FORUM: FOCUS ON ADDITIVE MANUFACTURING

Top features will include the **T.Gold Smart Hub** – a new technology event area set up in the centre of Hall 4 – which, on **7th September**, will be hosting the **Jewellery Technology Forum**. To celebrate its twenty-first anniversary, the Forum will evolve into a thematic platform on **Additive Manufacturing for the jewellery and luxury sectors**, thus becoming a meeting point for research, industry and design with the aim of exploring new frontiers of additive manufacturing and its impact on production and creative processes through presentations and case studies from international experts and key opinion leaders.

STRATEGIC PARTNERS

T.Gold's strategic positioning as a cornerstone of the industry's **tech agenda** for technological innovation applied to jewellery manufacturing was further strengthened in 2026 by renewing its three-year partnership with **AFEMO**, the Jewellery Machinery Manufacturers and Exporters Association, and its collaboration with **ICE Meccanica** for targeted buyer incoming. «The partnership with AFEMO,» says **Matteo Farsura, Global Exhibition Manager for Jewellery & Fashion at IEG**, «is a strategic asset not only for T.Gold: it will involve every Jewellery & Fashion Division event for technologies applied to goldsmithing and jewellery with a strong international focus. Oroarezzo, the sector-specific event focused on manufacturing, which every May puts the spotlight on the Arezzo district and, through its Precious Fashion project, also targets the high-end metal fashion accessories supply chain; in the United Arab Emirates in autumn, JGDT – Jewellery Gem & Technology in Dubai; and SIJE – Singapore International Jewellery Expo in July in Singapore. Our aim is to build, together, an innovation platform extending across all our B2B events that can promote the transfer of expertise and support the international competitiveness of businesses within the sector.»

TECHNOLOGY: THE DRIVING FORCE BEHIND THE JEWELLERY SUPPLY CHAIN'S DEVELOPMENT

With an increasingly international and integrated technological offer due to its relocation from Hall 9 (outside the Expo Centre) to Hall 4 (within the facility's grounds) – part of the wider development programme undertaken by IEG, supported by a 60-million-euro self-financing for infrastructure expansion resulting in the opening of the new Hall 2 in September –, the strengthening of industrial partnerships and a programme focused on the new frontiers of Additive Manufacturing, **T.Gold** reaffirms its status as the leading platform for innovation at the service of the entire jewellery and watchmaking supply chain. «With this edition, T.Gold is taking a decisive step towards further growth,» says **Matteo Farsura**. «Its move into IEG's Expo Centre and total integration with Vicenzaoro strengthen the role of **technology as a driving force behind the jewellery supply chain's evolution** and expand business opportunities, contributing to the development of an industry that has to constantly navigate through rapidly changing markets. It is not just a question of machinery, but also expertise, research and innovation that ensure the sector's future.»

FOCUS ON

Italian Exhibition Group S.p.A., a joint stock company listed on Euronext Milan, a regulated market organised and managed by Borsa Italiana S.p.A., has, with its facilities in Rimini and Vicenza, achieved national leadership over the years in the organisation of trade shows and conferences. The development of activities abroad - also through joint-ventures with global or local organisers, in the United States, United Arab Emirates, Saudi Arabia, China, Mexico, Germany, Singapore, Brazil, for example – now sees the company positioned among the top European operators in the sector.

This press release contains forecasted elements and estimations that reflect current management opinions (“forward-looking statements”) especially regarding future managerial performances, investments, cash flow trends and financial organization evolution. By nature, forward-looking statements have an element of risk and uncertainty since they depend on future events. The effective results may therefore differ, even significantly, to those announced due to multiple factors including, merely by way of example: the catering market’s foreign trends and tourist flows in Italy, market trends in the gold-jewelry industry and in the green economy; developments in the price of raw materials; general macro-economic conditions; geo-political factors and changes in the legislative framework. Furthermore, the information in this press release does not claim to be complete, nor has it been verified by independent third parties. The forecasts, estimations and objectives presented herein are based on information available to the Company at the press release issue date.
