FINE JEWELRY FROM MILAN

"We just could not imagine of doing anything else than creating jewelry"

Andrea, Paola and Simone: a family tradition.

## JEWELRY IS A FAMILY TRADITION

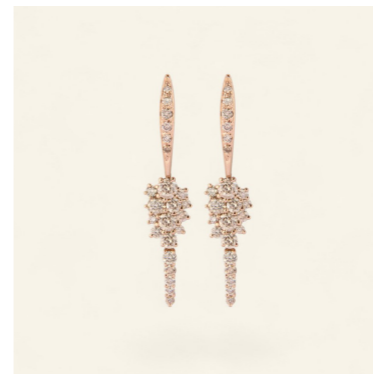

Brusi began its history in the heart of Milan, in the early 1930s. Now, after three generations, our passion and commitment are as strong as ever. All the jewelry from the house is handcrafted with care in our atelier, making it 100 % made in Italy.

As a team, we feel lucky to be able to work with handpicked materials that are then transformed into unique pieces of jewelry. The attention to detail that goes into choosing the gemstones we use allows us to create bespoke, natural pieces that are one-of-a-kind. Our jewelry tells unique stories that our customers will cherish forever.

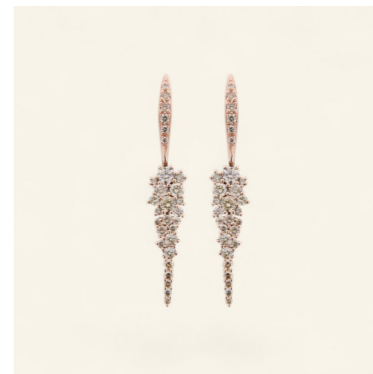

## BRIGHTFALL COLLECTION

A cascade of pure light with champagne diamonds is a central feature in these balanced, irregular structures. Even in the most dramatic sizes, they always guarantee a comfortable wear thanks to their many articulation points.

Brightfall Ring Round

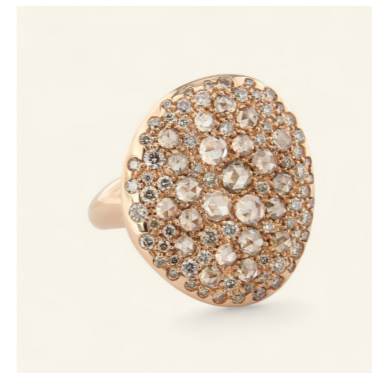

## CANNELLA COLLECTION

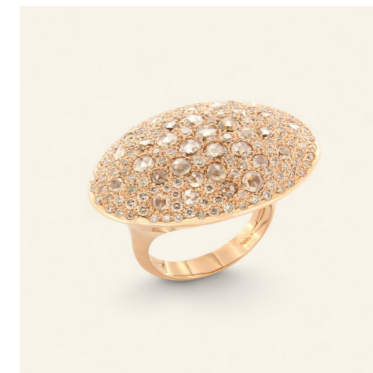

The design is inspired by the unexpected harmony of nature, with its ability of arranging elements in a delicate balance. Brilliant cut and rose cut diamonds gently adorn each piece.

## NATURAL JEWELRY

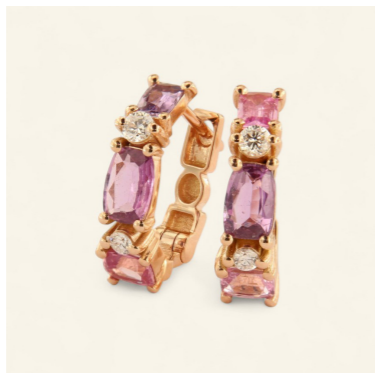

Our approach to jewelry comes from a true devotion to natural beauty. Nature serves as the main inspiration with its variety of different shapes and structures, and Brusi embraces this perfect asymmetry to create jewelry that is an extension of the wearer's individuality and personal expression. Each piece celebrates the unexpected beauty that can be found in natural imperfections.

The process of designing pieces flows more organically and intuitively, like a creative collaboration between the designer and nature. The slight deviations and imperfections in the shapes and details of our jewelry are reflection of the diversity and beauty found in nature.

## THE LUMIA COLLECTION

The rings and earrings in this collection are characterized by large, natural stones illuminated by a contour of diamonds.

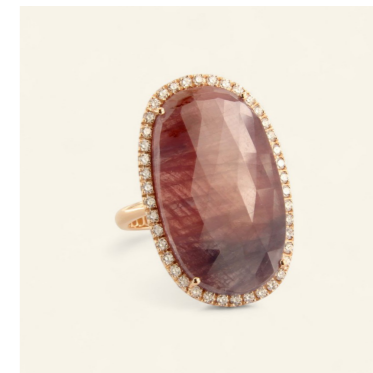

The bold and irregular shapes of the central stones are balanced by the essential structure of the pieces.
